Subsea Houston 2006

Chevron is pleased to announce we will be hosting Subsea Houston 2006, on October 2-4, at The Woodlands Waterway Marriott located in Houston, Texas. Subsea Houston 2006 provides an opportunity for open and candid discussions regarding current and future subsea technology requirements. A major highlight of the conference is a forum where students from approximately 15 universities meet to discuss the latest innovations in subsea technology.

Additionally, the conference provides an opportunity for representatives from oil companies, universities, vendors, contractors, host governments and industry partners to meet and strengthen existing relationships, along with fostering new ones.

Subsea Houston 2006 will also provide an excellent opportunity for:

- Subsea engineers to increase knowledge of current business trends by learning the latest technologies and capabilities of vendors and contractors
- Interest in employment in the subsea industry among the student population to be stimulated.

Chevron is sponsoring this event to:

- Provide an opportunity for students to attend and develop an understanding of career opportunities in the subsea discipline
- Reinforce Chevron's position in the subsea industry by demonstrating willingness to support and lead technical and commercial innovation
- Encourage not only development of technology but to also support understanding the deployment of technology.

We invite you join us at Subsea Houston 2006, on October 2-4, in The Woodlands, Texas.

Sincerely,

Randy Kubota
