1600 Highway 6, Suite 300 \* Sugar Land TX 77478 USA

Tel: (281) 491-5900 \* Fax: (281) 491-5902 \* [www.questoffshore.com](http://www.questoffshore.com)

## *Regional Deepwater Maps Highlighting Subsea, Floating Production & Drilling Prospects*

Created due to strong interest from Operators and Contractors for maps to support their long-term, “future project” planning activities, while providing them with the perfect “visual” geographical and infrastructure tool. As well as, see what projects they may be able to facilitate in the years to come. These highly popular maps not only show the current offshore infrastructure, but also highlight the location, time-frame and number of subsea wells (where known), floating production facilities, plus the major drilling prospects too!

The maps are a professional, eye-catching ~40 inches (102cm) deep x 63 inches (160cm) wide, produced in full color and offer an impressive print run of **10,000 copies**.

**Data Included:** main drilling prospects, symbols indicating each potential Subsea Development and likely number of trees, color coded by status (operational, possible, probable, FEED, Detailed Engineering, Under Construction) and/or installed/potential floating production systems color coded by status with unique symbols (Spur, TLP, FPSO, Semi) identifying the proposed system type. Major Trunklines, lease area name, block number and Operator, Bathymetry, shorelines, coastlines etc.

### *Extensive Map Distribution*

The map will have a total print run of 10000, with 7000 being direct mailed to deepwater specialists globally from our in-house “Quest Deepwater Client Database”. Other copies include advertisers = 800, Exhibitions/conferences/events = 1500 (includes OTC and the 3 Quest Deepwater Events), Promotional copies, specially laminated maps = 700
